REFRAMING 'IRREGULAR': NOT RARE, NOT INSIGNIFICANT, NO LONGER OVERLOOKED

Focussing on abnormal menstrual bleeding and women's reproductive health, the 2026 WIRF Scientific Dialogue will bring together leading investigators and emerging research talent for an engaging afternoon of research, discussion and debate.

KEYNOTE SPEAKER:

The Keynote Address will be given by **Dr Jacqueline Maybin**, Reader and Honorary Consultant Gynaecologist, Centre for Reproductive Health, University of Edinburgh & NHS Lothian.

Dr Maybin is a leading UK clinician scientist with an eminent track record in menstrual and reproductive health research. Dr Maybin runs a specialist menstrual disorders service offering medical and surgical treatments. Her research team aims to develop better preventative and therapeutic strategies for problematic menstrual bleeding, a common and debilitating symptom. Dr Maybin currently serves as a Program Director at Wellcome Leap. She leads the Missed Vital Sign program, which is designed to bring together cross disciplinary teams with disruptive approaches to transform how we identify, diagnose and treat abnormal menstrual bleeding. Dr Maybin is passionate about public and patient involvement in research, equality and diversity, and training the next generation of clinical and discovery scientists.

Other confirmed speakers include outstanding WA investigators and clinician scientists: **Dr Jacqueline Frayne, Dr Sara Morris, Dr Dane Cheasley, Professor Luke Haseler**, and **Dr Felicity Roux**. Additional presenters to be announced.

The program will also showcase the 2026 WIRF Research Acceleration Award winners, dynamic presentations from our student competition, an interactive Q&A session, and a thought-provoking consumer panel hosted by **Joanne Beedie**.
